

KIDS for the BAY

Watershed Action Program

2006-2007

A Project of Earth Island Institute

Leslie Haynes
Watershed Action Program Director

Presentation Goals:

- **Overview of the Watershed Action Program**
- **Classroom Workshops, Action Projects and Fieldtrips**
 - **NOAA Special Projects**
 - **Questions/Comments?**

WAP Program Overview

The Watershed Action Program has a three-part focus:

- ***Five 2-hour Classroom Workshops.*** Students learn about their local watershed and its features through hands-on scientific experiments and investigations.
- ***Action Projects.*** Action projects are service-learning projects in which students take responsibility for their local watershed.
- ***Fieldtrips to Local Creeks, Bay and Ocean Shoreline Habitats.*** Fieldtrips help students link what they learn in the classroom to the environmental community around them.

Workshop One: Our Watershed

Workshop Two: Taking Action for a Healthy Environment

Workshop Three: Watershed Environmental Health and Food Chains

Workshop Four: Bay Organisms and Water Conservation

Workshop Five: The Environmental Justice Movement and Taking Action

Action Projects: Taking Responsibility for their Local Watershed

Action Projects: Native Plantings

Fieldtrips: Creek Habitat Explorations

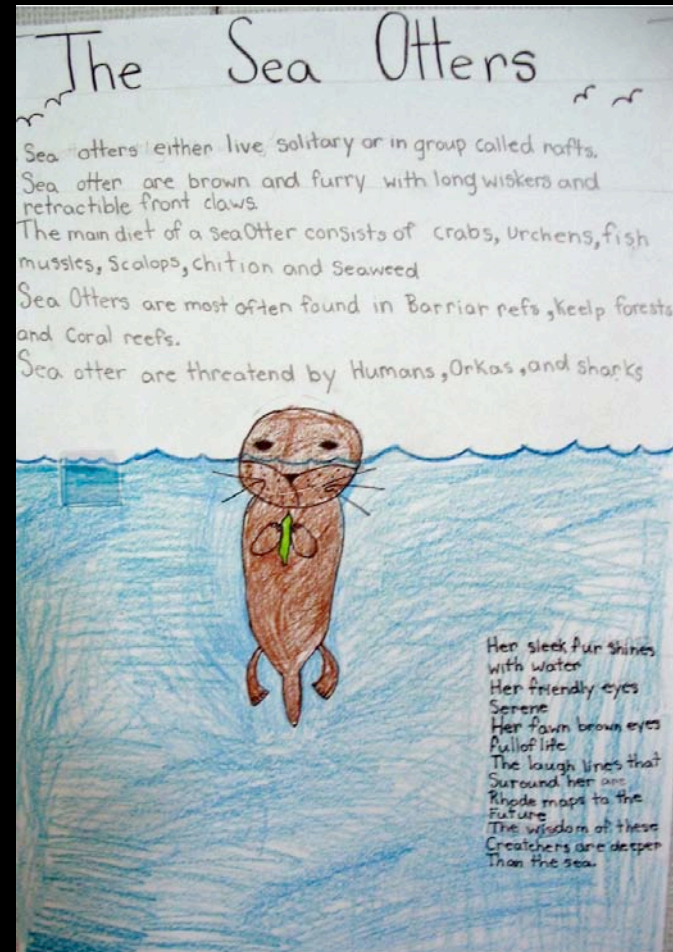

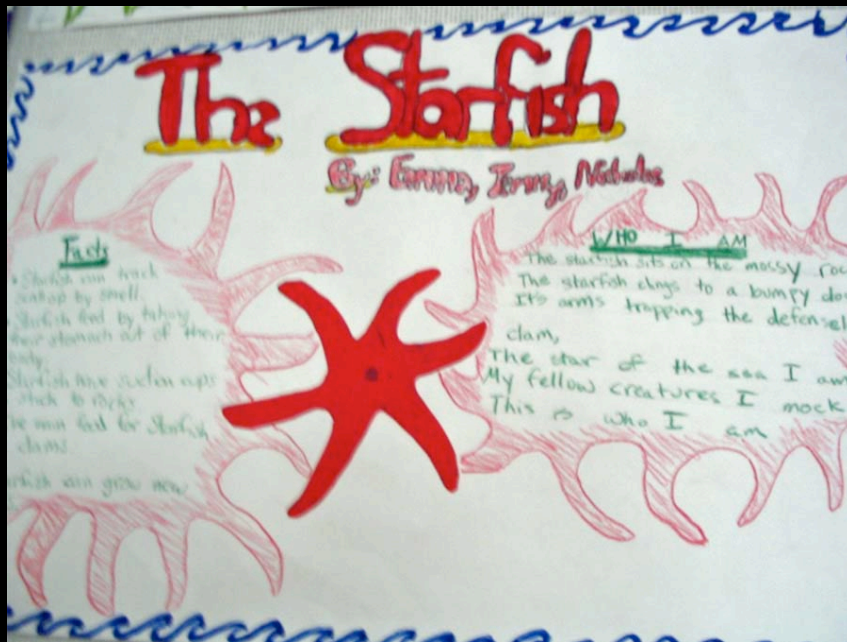

Fieldtrips: Bay and Ocean Habitat Explorations

NOAA Special Projects: The Shark Mobile

NOAA Special Projects: Marine Animal Informational Posters
